PAYMENT HARDWARE

Engineered for outdoor EV charging, our devices deliver reliable performance in extreme conditions with maximum uptime.

PAYMENT PROCESSING

Accelerate deployment with middleware-driven integration—reducing EMV L3 time, cost, and complexity.

MERCHANT SERVICES

Flexible, end-to-end services with competitive rates, secure processing, and clear reporting to help you scale.

CHARGER *Omnichannel*
PAYMENT SOLUTIONS

IDTECH[®]
Value through Innovation

Power the EV charging solutions with *card-present payments*.
Secure, reliable, and easy to integrate.

Increase Revenue with Flexible Payment Options

Support a wide range of payment methods to improve accessibility and maximize charger utilization.

Engineered for Extreme Environments

With robust IK/IP protection and wide temperature support, our devices are ready for any outdoor deployment.

Simplify Payment Certification

Accelerate deployment with solutions already certified across major payment processors.

Remote Management Made Easy

Onboard, update, and monitor devices remotely with centralized management tools.

Seamless CPMS Compatibility

Ready to integrate with leading Charge Point Management Systems for a unified charging experience.

Competitive Merchant Services

Optimize processing costs with transparent, competitive pricing tailored for high-volume transactions.

Fast Payment Integration

Streamlined integration reduces development time and lowers costs for OEMs and ISVs.

Dedicated Technical & Customer Support

Experienced support teams ensuring smooth deployment and ongoing operation.
